About me

More than 15 years of experience in software development, where I played all the roles: programmer, analyst, team leader and technology manager.

Extensive experience in different technologies, integration of complex systems, coexistence of legacy with modern software solutions and technological renovation processes.

Skills

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Interests

I am particularly interested in those methodological approaches to increase the quality and predictability of software development processes, both classical methodologies (CMMI) and agile (Scrum, Kanban). Also in how to get both (classical and agile) work together. I am interested in international projects and/or related to University research and technological innovation.

Education

2012-2012	Executive Program in Project Management Preparatory to obtain the PMP certification	EOI
2011-2012	Master's Degree in Business Administration Second best project of the promotion	EOI
2000-2002	Computers Engineer's Degree Average grade: A	UGR
1996-1999	Computers Diploma of Higher Education Average grade: A	UCO

Experience

2003 - Act.	Technology Manager I have had different stages in the last years: <ul style="list-style-type: none">Since 2015, directing the technological renovation, with the great challenge of transforming the already successful current solutions in the reference in the future. I manage the technological strategy of the Berger Levrault group in Spain. I also participate as a technical reference in international projects of the group.In the period 2013-2015: directing the area of eGovernment, Architecture and Integration. With a large team of development engineers we develop leading solutions and certification in the field of Local Government in Document Management, BPM, Portals, EeProcurement, Business Intelligence solutions and mobile access to municipal services by citizens.Previously, I assumed the job of Technical Product Manager in the Finance Area (Assets Management, Grants Management), leading development teams and technical evolution of the products.	Aytos Berger Levrault
2002-2003	Analyst-Developer I participated mainly on two projects: <ul style="list-style-type: none">Analysis and development of Corporate Intranet for <i>Cepsa</i> (a Spanish petroleum company).Development of Human Resources Supply System for <i>Correos</i> (the Spanish public mail company).	Coritel - Accenture
1999-2000	Developer I was a developer in a project to create an ERP tailored to <i>CajaSur Renting</i> .	Aconsa - CajaSur
